

Hands On Lab

```
rushi@rushi:~/practice$ cd logs
rushi@rushi:~/practice/logs$ ls
access.log  app.log  backup.log  error.log  notes.txt  out.txt
rushi@rushi:~/practice/logs$ touch server.log
rushi@rushi:~/practice/logs$
rushi@rushi:~/practice/logs$ printf 'INFO ok\nERROR disk full\nWARN slow\nERROR timeout\nERROR disk full\n' > server.log
>
> ^C
rushi@rushi:~/practice/logs$ cat server.log
rushi@rushi:~/practice/logs$ printf "INFO ok\nERROR disk full\nWARN slow\nERROR timeout\nERROR disk full\n" > server.log
rushi@rushi:~/practice/logs$ cat server.log
INFO ok
ERROR disk full
WARN slow
ERROR timeout
ERROR disk full
rushi@rushi:~/practice/logs$ grep ERROR server.log
ERROR disk full
ERROR timeout
ERROR disk full
rushi@rushi:~/practice/logs$ grep -c ERROR server.log
3
rushi@rushi:~/practice/logs$ grep ERROR server.log | sort | uniq -c | sort -rn
  2 ERROR disk full
  1 ERROR timeout
rushi@rushi:~/practice/logs$ grep ERROR server.log | sort | uniq -c | sort -rn | tee error_summary.txt
  2 ERROR disk full
  1 ERROR timeout
rushi@rushi:~/practice/logs$ cat error_summary.txt
  2 ERROR disk full
  1 ERROR timeout
```

ASSIGNMENT

```
rushi@rushi:~/practice/logs$ printf "INFO ok\nERROR disk full\nWARN slow\nERROR timeout\nERROR disk full\n" > server.log
rushi@rushi:~/practice/logs$ cat server.log
INFO ok
ERROR disk full
WARN slow
ERROR timeout
ERROR disk full
rushi@rushi:~/practice/logs$ grep ERROR server.log | sort | uniq -c | sort -rn | tee error_summary.txt
  2 ERROR disk full
  1 ERROR timeout
rushi@rushi:~/practice/logs$ grep ERROR server.log | awk '{ $1=""; print $0 }'
disk full
timeout
disk full
rushi@rushi:~/practice/logs$
```

Homework

write one line that counts INFO vs WARN vs ERROR separately.

```
rushi@rushi:~/practice/logs$ grep -c ERROR server.log && grep -c WARN server.log
3
1
rushi@rushi:~/practice/logs$ grep -c ERROR server.log && grep -c WARN server.log && grep -c INFO server.log
3
1
1
rushi@rushi:~/practice/logs$
```
